

# Global seafarers during the COVID-19 pandemic

## Survey

**If you are currently working on an international vessel**, a joint university research team want to hear about your experiences at sea during the COVID-19 pandemic.

The aim of the survey is to understand how the pandemic is affecting international seafarers and to identify factors that may help crews in the future.

### TAKE PART

The survey is intended for all seafarers working on international vessels (i.e. vessels with an IMO number) who are currently on board.

The survey will take about 20-30 minutes to complete. You will be asked about your experiences on board, as well as background questions about you and your ship. Your answers will be anonymous and will be used to make recommendations to improve life at sea.

Go to the survey: <https://webropol.com/s/survey-seafarers-during-pandemic>

### SHARE THE LINK

Please share the link to the survey with other international seafarers who are currently on board and who might be interested in participating.

### CONTACT

This research project is carried out by an international team of researchers from the University of Queensland (Australia), Royal Holloway University of London (UK), Uppsala University (Sweden) and the World Maritime University (Sweden).
